## NOTICE

We are pleased to announce the commencement of a new Engineering Value added Course aimed at enhancing your practical skills and knowledge in the field of Computer Science Engineering. This course is designed to complement your existing studies and provide hands-on experience that is crucial for your professional development.

### Course Details:

1. **Name of Course:** Object Oriented Programming C++.
2. **Date:** 03/02/2024 to 09/03/2024
3. **Duration:** 36 Hours.
4. **Schedule:** 6 hours Every Saturday (Offline Mode).
5. **Venue:** CSE Department

### Course Content:

- Introduction to Object Oriented Programming and Objects and Classes
- Operator Overloading, Inheritance and Polymorphism
- Polymorphism
- Streams and Files
- Templates, Exception Handling and STL

### Benefits of the Course:

1. **Encapsulation:** OOP allows you to bundle data (attributes) and methods (functions) that operate on that data into objects. This makes your code more organized and easier to manage.
2. **Reusability:** With concepts like classes and inheritance, you can create reusable code components. This reduces redundancy and makes your code more efficient.
3. **OOP in C++ promotes modularity.** You can break down a complex problem into smaller, manageable pieces (classes and objects). Each module can be developed, tested, and maintained independently, leading to better project management.

**Registration:** Interested students are requested to register for the course. Limited seats are available, so we encourage early registration.
