This is to certify that Ms. Namrata Uttamrao Patil, Final year student of B.Tech Chemical Engineering, Padmabhooshan Vasandraodada Patil Institute of Technology, Sangli - 416304, has undergone training in Chemical Technology Division, Bhabha Atomic Research Centre, Trombay from 01/02/2024 to 30/04/2024. During the above mentioned training period, she studied Iodine-Sulfur process, Decomposition of  $H_2SO_4$  using hot flue gas as heating media and design of a Double Pipe Heat Exchanger with Helical Fins, along with associated unit operations and processes. She has carried out a preliminary process design of Double Pipe Heat Exchanger in two different geometries (Double pipe & Helical fins) and compared the two designs for Decomposition of  $H_2SO_4$  using hot flue gas. The design of Double Pipe Heat Exchanger with Helical fins will be used for decomposition of  $H_2SO_4$  into  $SO_2$ , Water and Oxygen.

During the above mentioned period she was found sincere and hardworking with keenness to learn the R&D aspects of process. I wish all the best for her bright career.

5 Courses

Nimisha Naresh Phadnis

has successfully completed the online, non-credit Specialization

## Python 3 Programming

This specialization teaches the fundamentals of programming in Python 3. We will begin at the beginning, with variables, conditionals, and loops, and get to some intermediate material like keyword parameters, list comprehensions, lambda expressions, and class inheritance. You will have lots of opportunities to practice. You will also learn ways to reason about program execution, so that it is no longer mysterious and you are able to debug programs when they don't work. By the end of the specialization, you'll be writing programs that query Internet APIs for data and extract useful information from them. And you'll be able to learn to use new modules and APIs on your own by reading the documentation. That will give you a great launch toward being an independent Python programmer.

### Python Basics
